## Project And Experience

---

### LOKO & LOKO FOOD

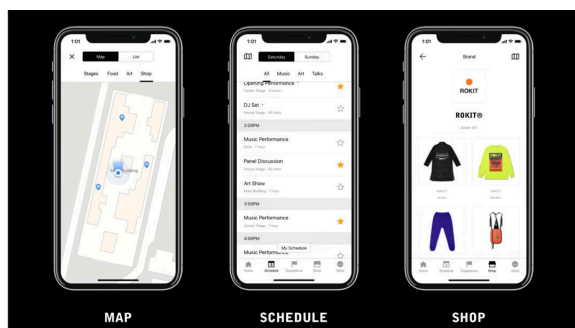

<https://lokofood.hk>

<https://loko.hk>

LOKO.HK 一個幫助香港小店的平台，為香港的小店建立一個宣傳平台。

LOKOFOOD.HK 為客戶提供跨區外送速遞的電商平台，客戶可以在上選購隔天需要的午餐

## HYPEFEST by Hypebeast

<https://hypefest.com/>

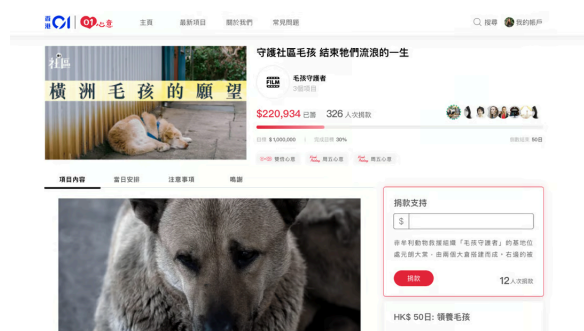

Mobile App developed by ReactNative. For a 2 days event named HYPEFEST.

User was able to view the full program rundown with event schedule, happening and news. Also provided geo-fenced marketplace to let the participant purchase the products at the festival

The app builds by me in 3 months. Included setup contentful API and data structure. The Marketplace hookup Shopify API for shopping cart

Skills : React-Native, Contentful API, Geo-Fenced

## 01 Heart by HK01

<https://heart.hk01.com/>

HK01 Project to let NGO submit their campaign and let HK01 members donate the projects

Responsive WebApp developed by ReactJS and NodeJS. The launch phrases project build by me from scratch and required to lunch in a tight deadline.

My Responsive is build 3 web app (Admin Panel, Organization application form, Public facing ) and Backend API. The site also plugged in HK01 mobile app as web view and hookup HK01 self-developed payment gateway

Skills : React-JS, NodeJS, NextJS, MongoDB, AWS API-gateway and Lamdba, Microservice

## Roarship by BOMBA

<https://www.roarship.com/>

Project from HK local YouTuber BOMBA. The aim to build a NETFLIX-like platform that selling the own video.

Used WordPress as the main infrastructure, also included WebSocket for messaging, AWS Elastic Transcoder for HLS streaming, Stripe/WeChatPay for payment

I worked with my partner to finished the initialize phrase. I mainly working on the Backend and DevOps side to solve the HLS streaming performance issue, Payment system hookup, WordPress plugin implementation..etc

Skills: Wordpress, PHP, Docker, AWS ECS, AWS cloudFront, AWS Elastic Transcoder, Cloudflare

## GOGOENERY by GOGO VAN

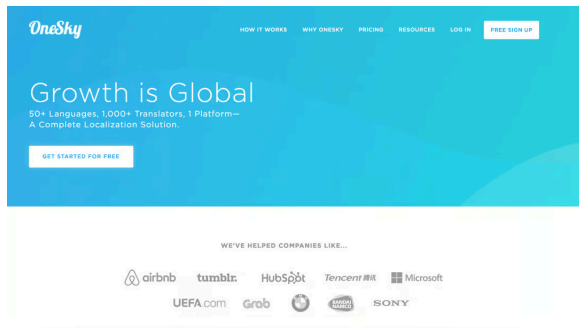

<https://gogoenergy.hk/>

GOGO VAN owned pet-project. Issue GOGOENERGY fuel card to offer a discount to drivers

Helped them to develop the landing page with ReactJS.

Skills: ReactJS

# OneSky

<https://www.oneskyapp.com>

OneSky a SaaS translation service platform. Which providing translation service to big clients

Working with them to maintain the system such as bug-fix and enhancement in the last 2 years and keep going. Their backend quite complex and included many microservice written by different programming languages (PHP, scala, nodejs, python, ruby... ).

I work closely with the customer success and sales team to resolve the client's request, Also included bug fix and featured request. So, I needed to work on both frontend and Backend.

Skills: PHP, Zend, MySQL, Scala, MySQL, Postgresql, MongoDB, ElasticSearch, Redis, AngularJS, ReactJS....
