Work Experience

Cognizant, Sr Associate, Mar 2022 ~ Present

- Led a team of 6 Developers, 2 Testers, and 1 Business Analyst to ensure on-time project delivery.
- Managed client interactions with Nolan Transportation Group (USA) and Frontier Agriculture Pvt Ltd (UK), handling scrum calls and meetings.
- Gathered client requirements and delivered high-quality, standards-compliant code.
- Developed RESTful APIs based on client specifications.
- Designed and implemented frontend features using Angular 2+ and ReactJS.
- Conducted unit testing for RESTful APIs with the Jest framework.

Kellton Tech Solutions Ltd, Technical Lead, Jul 2021 ~ Mar 2022

- Served as a Technical Lead, managing client interactions with Adstream UK, and actively participating in scrum calls and client meetings.
- Worked on the Adstream App, an HTTP server within the browser that enables users to log in, register, and access various business functionalities through RESTful APIs.
- Conducted APIs unit testing using Chai and Mocha frameworks.
- Performed UI Testing using the Protractor framework.

Infogain India Pvt Ltd, Senior UI Consultant, Aug 2017 ~ Jul 2021

- Worked as a Team Lead, managing client interactions with FedEx US, and participating in scrum calls and client meetings.
- Led a team of 5 developers to deliver a project 2 weeks ahead of schedule.
- Created various types of documentation at the organizational level.
- Managed release processes, including code deployment in staging and production environments, and provided production support.
- Developed the Paytm web app using an HTTP server, enabling user login, registration, and access to business functionalities via RESTful APIs.

- Developed the Seller Panel web app as an HTTP server, enabling Paytm to connect with merchants and provide order notifications, status updates, and cancellations via RESTful APIs.
- Wrote Node.js scripts to perform database operations, including insertion, deletion, and updates.
- Conducted APIs unit testing using Chai and Mocha frameworks.
- Worked on the AWS instance setup for a web application.

Friends Color Images Pvt Ltd, Software Engineer, Jan 2017 ~ Aug 2017

- Created and deployed the Smartbox web app, which uses an HTTP server to retrieve parcel information from Flipkart and create parcels in our system via RESTful APIs.
- Designed and developed the terminal page on the front end using Meteor.js.
- Designed and implemented the Smartbox mobile app, which operates as an HTTP server on Android devices, enabling users to log in, register, and access various business functionalities through RESTful APIs.
- Refactored and optimized a complex database system by preventing data leaks, improving query efficiency, and implementing indexing.
- After refactoring and optimizing the database, we increased the API speed by 15%.

Excellence Technosoft Pvt Ltd, UI Developer, Nov 2014 ~ Dec 2016

- Developed the Comstice web app, which uses an HTTP server to insert and update user and call information in a NoSQL database via RESTful APIs. Also created the UI using AngularJS to display information about different types of calls.
- Implemented various charts to visualize data using the D3.js library.
- Developed the Towken mobile app, which functions as an HTTP server on Android devices, providing users with discount coupons across categories like shopping, restaurants, and salons through RESTful APIs.
- Integrated Google Maps APIs into a web app developed with AngularJS.
- Conducted unit testing for the front end of the web app using Jasmine and Karma frameworks.
- Refactored and optimized JavaScript code by applying various best practices.
- After refactoring and optimizing the database, we increased the API speed by 25%.
