PROJECTS

Tifin Buddy   source code

🔗 https://tiffin-managment-system.vercel.app/

Tiffin Booking System | **ReactJs,NodeJs,ExpressJs,MongoDB,Tailwind css,Cloudinarry,Razorpay**

- **User Browses and Selects:** Users browse tiffin providers and their menus on a ReactJS frontend.
- **Add to Cart and Checkout:** Items are added to the cart, and users proceed to checkout, logging in via jwt aut hentication.
- **Payment Processing:** Payments are handled securely using Razorpay.
- **Order Management:** The order details are saved in MongoDB and managed by the tiffin provider via their dashboard.
- **Real-Time Updates:** Users receive real-time updates on order status from preparation to completion.

Job-portal System

🔗 https://github.com/parthiv47/FSD_PROJECT

Job portal System | **ReactJS,springboot,Mysql,Tailwind css,Cloudinarry**

- Developed a job portal project utilizing Spring Boot for the backend and React for the frontend, enabling job seekers to browse available jobs and employers to post, delete, and update job listings. Practiced REST API principles and implemented CRUD operations to facilitate seamless interaction between job seekers and employers
