## OBJECTIVE

Eager developer aiming to utilize proficiency in various programming languages and frameworks to make impactful contributions to cutting-edge projects. Committed to perpetual growth, adept at tackling challenges with an unwavering focus on delivering top-notch solutions within a collaborative setting.

## PROJECTS

### SUPER MARKET CHECKOUT APP

- Innovative developer behind a Checkout-Free Supermarket App revolutionizing shopping experiences.
- Engineered seamless product scanning and payment functionalities, enabling users to bypass traditional cashier scanning.

### LIBRARY MANAGEMENT SYSTEM

- This Spring Boot library management system streamlines operations for both students and librarians.
- Students can easily search for and borrow books.

### PARKING BOOKING SYSTEM

- Skilled Android Developer for a Parking Booking System app, enabling advanced space reservations with secure payments
- Designed intuitive UI/UX, integrated payment gateways, and ensured real-time space availability updates.
